TECHNICAL SKILLS

Languages: Java, SQL, TypeScript, HTML/CSS

Frameworks: Spring Boot, Spring Batch, Angular

Tools: Jira, IntelliJ IDEA, Eclipse, Maven, Bitbucket, Postman, SoapUI, Jenkins, Rancher, Splunk Enterprise, Veracode, ActiveMQ

Database Management: Oracle SQL Developer, MySQL, Microsoft SSMS

EXPERIENCE

Capgemini

Bengaluru

Java Developer — BSS Middleware Project

Mar. 2022 – Present

- Contributed significantly in designing and developing Spring Boot RESTful APIs and event-driven services for a leading US telecom client's Middleware Integration project
- Collaborated closely with team members to gather requirements, decipher E2E business flows, and deliver customized technology solutions for the client
- Executed the transition from a monolithic architecture to Spring Boot microservices, enhancing efficiency and scalability in our middleware and API framework
- Achieved enhanced sales processes, and increased productivity through advanced CRM features implementation and seamless integration collaboration
- Facilitated migration efforts from Red Hat Fuse to Apache ActiveMQ Artemis for integration and messaging requirements, alongside transitioning from SOAP to REST APIs

Java Developer — PLM Application

Oct. 2021 – Mar. 2022

- Collaborated on the back-end team to develop Spring Boot microservices, enabling seamless communication across PLM components.
- Developed a Spring batch Job to migrate Oracle database data to Elasticsearch, ensuring data integrity and a smooth transition
- Contributed to modernizing legacy systems, enhancing scalability and efficiency of the application, resulting in more than 30% performance improvement

Inventeron Technologies

Bengaluru

Project Intern

Mar. 2021 – May 2021

- Developed a real-time web application for stock prediction leveraging advanced Python libraries, including Facebook's Prophet for training data and Yahoo Finance API for retrieving stock data.

PROJECTS

FlyFlex — *Capgemini Training Project*

Oct. 2021 – Dec. 2021

- Designed and developed a full stack web application for flight booking, leveraging Spring Boot microservices for backend APIs and MongoDB for database management
- Implemented Spring Security with JWT token authentication for secure user authentication
- Designed and implemented the frontend using Angular framework
- Utilized GitHub for version control and incorporated Netflix Eureka server for service discovery and API Gateway for routing

EDUCATION

New Horizon College of Engineering

Bengaluru

Bachelor of Engineering in Computer Science & Technology

Aug. 2017 – Sep. 2021

8.4/10 CGPA

CERTIFICATIONS

Docker Essentials — *Cognitive Class by IBM*

Feb. 2024

AWS Certified Cloud Practitioner — *Amazon Web Services*

Feb. 2022

Agile Software Development — *Coursera*

Feb. 2022
